### CONGRESS.

Washington, Thorsday, P. M.-In the Haune, Mr. Conger, introduced a resolution to consider the act of yesterday, reterring the subject of Woodworth's patent to Committee of the Who'e, and to recom mit it to the Committee on Patents; also, to enquire into the expediency of repealing the law. Pending discussion the House went into Committee of the Whole, and took up the California question.

Mr. Hubbard spoke, contending for the right of the people in the territories to carablish their own political and social reg-

Mr. Morse followed with a rapid Southern speech.

Mr. Morse (in the House) said that slavery existed in California, therefore he advocated non-interference. If the Wilmot Proviso passed he would go for a dissolution of the Union. He wished all the free Macks in the country were slaves.

In the Senate, the question of receiving politions for abolishing slavery was deba-163. Mr. Prait moved to tay the petitions on the table : year 12, mays 11. Mr. Seward moved their reception, and then to lay them on the table. Carried.

The California message was then taken up, and Mr. Douglass resumed his speech. He said that if the admission of California was delayed one year, that territory would divide into two States, and in that form de mand admission, which the North would advocate.

Mr. Hale moved the postponement of th subject a nil Tueslay. Carried.

Mr. Budger moved that Mr. Clay's com promise resolution be postponed until Mon day. Lost.

Mr. Cass resumed his speech commenced yesterday. He re-asserted the Nicholson ductrine, that the people themvelves must settle all internal policies.

Mr. Davis of Miss, would accept the Missouri compromise.

Mr. Ponte defined his position.

Mr. Dayton moved to postpone the sub jest until Wednesday, which was carried. Adjourned.

IRON Houses. A young man is New York has invented a new mode of constructing iron houses, of which the Tribune gives the following description:

"It embraces a rigid frame of cast iron pillars, with other parts of sheet iron. Pillars of peculiar construction are placed at equal distances, and each interlocks with the garders and cross sills, as well as the lintels, door and window frames, and all the parts which require to be firm, or to brace other parts. The panels are of sheet-iron, as also are the floors, ceilings, and shutters for the doors and windows .--To every part of the house there is an interior and an exterior wall, leaving an air chamber between; this renders each room fire proof, and each, if desired, may be made fire proof. The roof is also of iron, and comples to the walls and floors. The frame may be ornamented in the cast ng as taste shall dictate, and the whole may be painted to perfection, equal to the finest fresco work. The house will resist any kind of atmosphere in the most perfect manner, and when but together is so strong that it may be turned over and back again without injury. These buildings will be more desirable than any other, and may be taken apart in a few hours, and reput together on another site with entire facility. Having been taken apart, one may be packed in a small space, as the whole is in amull aectional pieces, so as to be fitted for rebuilding, and for changing the form, or extending in oither direction or in the beight, within a fea hours without preventing its use while being so altered or added sto, and without loss of any of the original building."

> THE BEST PRIEND .-- The most aprecable of all companions is a simple, frank man, without any Ligh pretensions to an oppressive greatoess; one who loves life, and understands the use of it; oldiging Alike at all limits; above all, golden tem per, and steadfast as an anchor. For such a one we gladly exchange the greatest genius, the most brilliant wit, the prefemdest th nker

" Who can paint like nature?" exclaimed a young lidy as also held a copy of Thomson's Seasons" in one band, while the other was clasped by hos entaptimed lover. " Alt ! what soul there is in that years-

### WHIG NOMINATIONS,

FOR GOVERNOR, HENRY B. ANTHONY, of Providence. FOR LIEUT, GOVERNOR, THOMAS WHIPPLE, of Coventry.

OUR SECRETARY OF STATE CHRISTOPHER E. ROBBINS, of Providence.

FOR ATTORNEY GENERALS JOSEPH M. BLAKE, of Bristol.

SO GENERAL TREASCREES BTEPHEN CAROONE, of Newport

### NOTICE.

The Whig Electors of Newport, are requested to need at the Town Hall, on WIDNESDAY EVENING NEXT, March 20th, at 7 o'clock, for the purpose of uniking acrangements for our Spring elections.

Washington, March 13, 1850. Political affairs are comparatively quiet new, although there is an occasional excell which agitats a little; but the general impression is that the highest pitch of excitemore and bad fooling has been passed through.

Mr. Webster's Speech has made a marked impression, and its influence will be extensively felt all over the country; it is particularly copular at the South, and will have an immense circulation there,-more than one hundred thousand copies of it have already been ordered. I do not know that the Slavery question is any pearer to a settlement now than it was a month ago, but then the majority evince a willingness to try almost any and all plans to adjust this most unpleasant difficulty; and so long as this feeling provails, there is hope of success.

Gur. Seward's speech accomplished nothing; it was quite too ultra in its Abutition ductrines. One thing is certain beyour question; if this difficulty is to be amicably settled, the North must yield a little, and the South must yield a little, and it is a matter of no importance which makes the first move. But if neither purty will give way, and the violent men of outh sections keep constantly agitating and imitating just so surely will there be a clash, and then, of course, the strongest will tramph. If a man will but calmly trace the whole matter from the commence ment, and watch the progress now, he can not but see the thing in its true light; and when he does this, if he is hones', and his attachment to the Union is sincere, he will be willing to lend his aid in the adjustment of the numble. I have spoken of this same thing before, and given my opinion both aditorially and in my letters, and the more I am convinced of the truth of my assertions, and the validity of my position. Let even the radical men of the North come South for a time, with a determination to be fair and just, and to decide coully and calmly, and they will surely settle down upon the same premises. I spure the idea of truckling to the South; but I would do what is right, even at the risk of the charge of yielding too much. With the Hotspurs of the South and the radical fanatics of the North, we have been plunged into an unsettled and dangerous state of things; therefore let the better men of both sections meet upon an honorable platform, and compromise the difficulty. My word for it, we have Red Ropullicans enough in this country who are moving heaven and earth for a dissolution of the Union, and their happiest day would be when the ed. Their minds are discused, and their hearts are dishenest, and, like normin hirds principle, they are making use of this pretended platform of phalasthropy for the amelioration of the condition of the slave, when, at the same time, very many of them would make infinitely worse masters than these who now rule the unfortunate negroes. It is these kind of men who are at the hottom of all the mischief, and they are playing their game with a good deal of shre duess; these are the men whom we have must to fear, because they are devoid

> They are demagogues, and must be close ly watched. Speeches are being constartly made in both Houses, but nothing is done , everything is laid aside and postponed on account of this main question, - and I do not think that any business will be transacted until some disposition can be made of this matter. The admission of California will probably settle the question, and a definite result will then be had.

of principle, although they are making the

loudest professions, and have actually gain-

ed a commanding position in the struggle.

MF Evi Siss Lecroices. - The series of discourses now in progress of delivery at the Clark street Church, is attracting much ctention. From the beginning, we learn, the services have been deeply interesting and the sermous of a high order. Rev. Mr. Childa of Charlestown, Mass., will deliver a lacture to young men this evening-subjest the Proligal Son. We would advise all young men to go and hear this discourse, perhaps it may tend to make them better if they are not impolessly past redemption. which we fear is the case with some, from the scenes which are witnessed in our streets on Salibath evenings.

ВПРТик Авримеск Вахо.-We поtie, that a subscript on paper is being circulated among the friends of this band for the purpose of obtaining a sufficient sum of mutey to obtain a suitable and appropriate uniform. This band is composed of young men who possess fine musical talents, and have manifested a great deal of energy in accomplishing themselves as they have; they have been to great expense in procuring their instruments and instruction and now wish to provide themselves with a becoming uniform, which we doubt not our citizens will assist them to, indeed, we are glad to learn that they have already obtained one half of the amount required. This is an opportunity in which our citizens can render the band great service, and for which they will be amply repaid by their excellent Music on all public occasions.

65-Spheroid Diguerrotypes .- We ave recently examined several specimens of platores taken by Mr. Williams, they were executed in the highest style of the act. That we do not speak too flatteringly, those of our readers who love to gaze on true, life-like, and delicately traced semblames of the hundre free, may easily conclude, if they pay Mr. Williams a visit at his rooms, on the third floor of the building corner of Washington Square, over the Park Salman," Our word for it, and wo stake the little of regulation and taste we passess on the issue, that these who make the call will find that Mr. Williams is in every respect deserving of a very high place, indeed, in the ranks of the best Dagnetreotype artest this country produces. Strong teremblance, truth and warmth of time and color, grace of attitude, a vectices, delicany, and unsurpresed beauty and effect in composition, characterize this aspiring artist to a remarkable degree, and must secure him that public notice and appreciating employment, which none more that he deserves.

3d. Theresh last not least of all, cornes RI-DER'S BOUBLE REFINED CAMPHENE, which is anknowledged by all, to be the lest and cheapest article for light. It has stood the test of this commenty for de last is years, notwithstanding the many attempts to reach it, by introducing an inferior article from New York and Boston. The superior advantage ours has over faring Compton is, that we distill it frost twice a week, and concentrally it will not smoke or cust the wick, like an article beingth from abroad. Thus, we family the public with an article from which they can obtain any aparity of Light, (equal to Gity Gas) at one-third of the expense, at the same time safe, clean, and from its make or small.—All the above our exercise, for which we had our selects responsible to the better, or we forfeit our trade, car reputation, and our served tonom.
